Curriculum Alignment with Common Core Standards

Each chapter in the Holt McDougal Algebra 2 Common Core Teachers Edition is systematically aligned with the CCSS. The curriculum follows a logical progression that builds on prior knowledge while introducing new concepts in a scaffolded manner. Below is a snapshot of how key topics align with specific standards:

- Polynomial and Rational Functions: CCSS.Math.Content.HSA.REI.B.5 – Analyze and interpret polynomial and rational functions.
- Exponential and Logarithmic Functions: CCSS.Math.Content.HSA.REI.C.3 – Apply properties of exponents and logarithms.
- Trigonometric Functions: CCSS.Math.Content.HSA.REI.A.6 – Use trigonometric functions to model periodic phenomena.
- Systems of Equations: CCSS.Math.Content.HSA.REI.C.6 – Solve systems of linear equations using

substitution and elimination.

- Matrices: CCSS.Math.Content.HSA.REI.C.7 – Perform operations with matrices and apply them to real world problems.

By maintaining this alignment, teachers can confidently demonstrate that their instruction meets rigorous state and national benchmarks.
